TINT GRAPHIX INKS

PRODUCT APPLICATION

Tint Graphix is a water-based flexo series developed for tinting ink applications. This series was designed to print on paper substrates. Most applications are to tint papers for bank deposit slips, file folders and applications that require tinting of a particular substrate that has a specific color requirement. Our most popular line of water-based flexo inks offers excellent press stability, low maintenance features.

PRODUCT FEATURES

- *Tint Graphix ink properties may vary depending upon the actual substrate used*
- *We recommend testing prior to use to ensure compatibility*
- *For added resistance we offer an overprint varnish*
- *Available in four color process and base colors*
- *Color matches available upon request*

PRODUCT BENEFITS

Excellent print stability and **even color distribution** allows your pressroom to run faster while minimizing problems...leading to increased profits.

TECHNICAL INFORMATION

Equipment specifications: Tint Graphix inks were developed to work with various tinting ink applications and are compatible to run on GP Tinters. For other tinting equipment we recommended contacting our Technical Department.

Quality control parameters: Viscosity: Press-ready at 20 - 25 seconds #3 Zhan cup with pH of 9.0 - 9.5.

Shelf life: Guaranteed for up to six months when stored in a sealed container. Optimum storage temperature is 50°-70° F.

Resistance: Chemical resistance properties vary with applications and substrates. Call our Technical Department for more product specifications.

Colors: Base and color matches available on request and custom developed to meet job specifications.

Pre-testing on actual substrate is always recommended.

Due to variations in stocks and other variables inherent in the printing process that are beyond the control of the ink maker, we cannot assume any responsibility for the final outcome of the printed job.
