HI TECH PROCESS INKS

PRODUCT APPLICATION

Hi Tech Process sheetfed inks are designed for high quality commercial printing, such as annual reports, where ultimate reproduction properties are required.

PRODUCT FEATURES AND BENEFITS

- *Hi Tech Process inks are a fast work and turn series that prints well on a wide variety of stocks.*
- *Inks are specially formulated with higher tack, viscosity and pigment strength to provide the optimum dot structure and still provide excellent gloss.*
- *Inks are trap rated — designated to print black, cyan, magenta, and yellow.*
- *As a result of their higher pigment strength, Hi Tech inks provide exceptional mileage.*
- *Inks have excellent press stability allowing them to be used on both short and long runs.*
- *Inks are UV coatable under many different conditions¹.*

TECHNICAL INFORMATION

Ink shades comply with the specifications set forth for SWOP, GRACoL and ISO 2846.

¹ It is very important to test under the same conditions the job will run. Not recommended to be UV coated on heavy coverage jobs printed on high hold out type papers unless a primer coat is applied..

Disclaimer: The technical information presented on our data sheets is correct to the best of our knowledge. Due to variations in stocks and other variables in the printing process beyond the control of the ink maker, we recommend the product be tested before application. Final determination for the performance is the sole responsibility of the user. The data presented is not to be interpreted as a warranty or guarantee as conditions of application could affect performance.
