Introducing the hardest working, most-precise color technician you'll never have to pay.

Get the ink you need right when you need it

With an AccuBlend™ dispenser, you'll never have to wait for spot color deliveries. You'll never have to delay jobs waiting for ink. You can make the exact spot color you need any hour of the day, any day of the year.

Eliminate waste by making just what you need

When the ink estimate calls for six pounds, you don't have to order 10 to play it safe. Because if you need more ink to finish a job, AccuBlend lets you dispense a perfect match in just the right amount. For larger runs that might require 50 pounds, you can just order 40 and make up the rest with confidence that AccuBlend will give you a perfect color match.

Achieve amazing color accuracy

For brand owners, there's no room for error when it comes to matching color, and AccuBlend, along with formulas from your ink supplier, lets you meet that demand. AccuBlend is accurate to +/- 0.001 per pound (0.5 gr) for every component that goes into the color. That means dead-on color delivery every time.

Turn your old inventory into new ink

With AccuBlend's unique software you can take all that old ink inventory sitting on your shelves, and blend it into new spot colors. That's a triple win because no longer do you have to over-order for longer runs, you can use up all the excess ink you've over-ordered in the past, and you can recapture all those dollars sitting idle on the shelf.

Keep your presses rolling and your clients happy

When clients want to alter color during press checks, or surprise you with an eleventh-hour rush job, AccuBlend lets you easily accommodate those demands. With your ability to make spot color, you'll decrease downtime and all but eliminate related change-outs.

Get maximum results with minimal training

With as little as 30 minutes of training, employees can be turned into color technicians. GFI's touch screen driven software, COLORBOOK™, makes functions easy and intuitive to use. If you can use a smartphone, you can use AccuBlend.

AccuBlend-HV™ for offset litho inks

Using mixing bases provided by your ink supplier, AccuBlend-HV can produce highly-viscous spot colors for conventional offset, dry offset, UV offset and metal decorating inks.

Its EcoFlow™ cartridges are filled by your ink supplier giving you the ability to make any color. Accommodating up to 18 cartridges, it gives you flexibility by having up to six extra slots for those bases you use most often.

Available Positions:	18
Cartridge Size:	8 pounds (3.63 kg)
Scale Capacity:	50 pounds (25 kg)
Dosing Accuracy:	(+/-) 0.001 lbs. (0.5 gr) per component
Monitor:	22" (55.88 cm) Touch Screen
PC:	Windows Based
Dimensions:	38-1/4" (95 cm) W x 75" (190 cm) H x 44" (112 cm) D
Weight:	750 lbs. when empty (340 kg)
Power Requirements:	120VAC, 60 Hz, UL-NEMA 5-15, 2 pole
Air Requirements:	90-130 psi (6.2-9.0 bar)
Ink Types:	All types of highly viscous paste inks

AccuMix-ML™: Tool-free automated mixing for all types of highly-viscous paste inks.

AccuProof-XP™: The fast and clean way to verify that your spot colors are dead-on before you go to press.
